Risks and Benefits of Anesthesia**

Anesthesia is a necessary procedure to make your pet comfortable during surgery. With any type of anesthesia comes a risk. Your pet may not wake up from surgery; however, we take every precaution to make sure that does not happen. We use the safest anesthesia possible for each animal. We also offer pre-surgical blood screening, which will check the health of your animal's organs. This is not to scare you, but to keep you informed. If you have any additional questions please ask, having surgery on your pet is at times very scary and we want to make this easy on you as well as your pet.

I, _____ (Owner's Name) understand and assume all risks of anesthesia

on _____ (Pet's Name).
